Professional Summary

Results-driven Python Developer with experience building AI-powered applications, backend systems, voice automation solutions, and workflow automations using Python, Django, PostgreSQL, n8n, and Vapi. Skilled in developing scalable web applications, integrating AI tools, building automation workflows, and deploying applications using cloud and DevOps technologies including Docker, Kubernetes, and AWS. Strong foundation in backend development, automation engineering, and AI-driven business solutions.

Technical Skills

- **Languages:** Python
- **Web:** HTML, CSS, JavaScript, React, Tailwind CSS
- **Frameworks:** Django
- **Databases:** SQLite, MongoDB
- **AI Tools:** ChatGPT, Gemini, Claude, n8n, Vapi AI
- **DevOps & Tools:** Git, Docker, Kubernetes, AWS, Terraform, Linux, Shell

Work Experience

Python Developer

July 2025 – Present

MCM BPO Pvt. Ltd. – Mumbai, India

- Developed and maintained dynamic web applications using HTML, CSS, JavaScript, React, Python, Django, and PostgreSQL. Initially built websites through manual development processes, and since December, leveraged Claude AI-powered development tools to enhance productivity, streamline workflows, and accelerate website development.
- Built and integrated Voice AI Agents using Vapi, and designed AI-driven automation workflows for CRM and lead generation using n8n with Python and JavaScript-based custom logic.
- Worked on AI automation solutions including WhatsApp Automation, Lead Scraping, CRM integration, AI chatbot deployment, lead generation, and email marketing automation for business operations and customer engagement.
- Performed manual website testing and quality assurance for enterprise communication platforms including UCaaS and CCaaS-based applications to ensure performance, usability, and reliability.

Projects

AI Voice Appointment Booking System

HTML, CSS, Javascript, React, Python, Django, PostgreSQL, Vapi, n8n

- AI voice agent handles appointment booking through voice conversations.
- Stores and manages appointment data using Django and PostgreSQL.
- Automates reminders and workflows using Vapi and n8n.

Emotion Detective System

Python, TensorFlow, Keras, OpenCV, NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, Streamlit, Flask

- Detects human emotions from text, images, or facial expressions.
- Uses machine learning models for emotion classification.
- Can be used for analytics, feedback systems, or user behavior analysis.

Fruit Juice Website *HTML, CSS, JavaScript, React, Python, Django, SQLite, Docker, Kubernetes, AWS*

- Responsive website for browsing and ordering fruit juices online.
- Backend manages products, orders, and user data using Django.
- Uses Docker, Kubernetes, and AWS for deployment and scalability.

Education

Bachelor of Science in Information Technology

Shri Ramswaroop Memorial University

2022 – 2025

CGPA: 7.1/10

Certifications

- **Introduction to Cloud** – IBM
[View Certificate](#)
- **Microservices & Architecture** – IBM
[View Certificate](#)
- **Big Data Analytics** – IBM
[View Certificate](#)

Hobbies & Interests

- Enthusiastic about exploring Geopolitics and International Relations, with a keen interest in global affairs and geopolitical developments.
